Portfolio: [Chaithu - Portfolio](#)

SUMMARY

Computer Science student specializing in Artificial Intelligence, Machine Learning, and Generative AI applications. Experienced in building end-to-end AI projects including computer vision systems, analytics dashboards, and AI-powered applications using Python, Streamlit, and machine learning models. Passionate about solving real-world problems using AI, rapid prototyping, and building scalable intelligent systems.

EXPERIENCE

Campus Delegate Internship | WeMakeScholars (HEST Campaign)

Dec 2025 - Jan 2026

- Worked as a Campus Delegate representing the HEST campaign, coordinated student outreach, promoted higher education opportunities, assisted in campaign activities, and demonstrated leadership, communication, and coordination skills.

Machine Learning with Python | Embrizon Technologies

Nov 2024 - Jan 2025

- Underwent intensive training in machine learning algorithms, model development, and deployment using Python and scikit-learn.

Coding & Programming | Samsung Innovation Campus

Sep 2024 - Oct 2024

- Successfully completed the course of Coding & Programming of Samsung Innovation Campus

Industrial Training – Assistant, Inspection Team | RANE

Dec 2022 - Jun 2023

- Collaborated with the inspection team to ensure quality compliance of 100+ automotive components weekly. Assisted in testing and evaluation, ensuring 95% on-time completion. Identified and reported deviations, supporting a 15% reduction in rework cases.

PROJECT

AI-Based Lost & Found Management System – Tech Stack: Python, Streamlit, Database, AI Matching

- Developed an AI-powered Lost & Found platform that allows users to report lost and found items with images and descriptions, enabling item tracking and matching using similarity logic, improving the chances of recovering lost items in campuses and public places..

Advanced Medical Imaging Tumor Detection System - Tech Stack: Python, Machine Learning, Streamlit, Computer Vision

- Created an AI-powered system that identifies tumors in medical scans, highlighting them with color-coded boxes based on severity. Deployed on Streamlit Cloud.

Ecobin-X: IoT-Based Waste Management System - Tech Stack: IoT, Sensors, Data Monitoring

- Award: Secured 2nd place among 50+ teams in an intercollegiate competition.

Designed an IoT solution enabling 24/7 monitoring of 10+ urban waste bins with sensor data, optimizing collection routes to reduce fuel costs by 12%

EDUCATION

B.Tech – Computer Science Engineering

Bharath University, Chennai - 2023 – Present | CGPA: 8.0+

Diploma – Engineering

KITS Institute of Technology & Science, Telangana - 2021 – 2023 | 75.6%

Secondary Education

Sri Chaitanya e-Techno School, Telangana - 2018 | 83%

SKILLS

Leadership: Team Coordination, Communication

Languages & Core: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn).

Machine Learning: Supervised & Unsupervised Learning.

Data Visualization: Power BI, Matplotlib, Seaborn, Chart.js.

Tools & Platforms: Streamlit, Git & GitHub, VS Code, AntiGravity, Google docs, Canva (Presentation Design)

FREELANCE

Presentation Work Repository

- Created comprehensive presentations (Ppt's) across various domains including corporate decks, academic research, and creative pitches.
